2.	south of the highway, crosses the highway about 3 km further on, and continues north of the highway at distances ranging from 30 to 300 meters. Just east of Tasdorf the line again crosses hational highway No 1. At this point a Soviet communication detail of six men equipped with climbers was working on the line. Tappings were not observed. A beaten track was noticed under the line. ome soldiers were quartered at a farm at Vogelsdorf (N 53/V 05).  25X1X In late largh the route of the same sixteen with the line was traced by second The line ran east
2.	Tasdorf the line again crosses National Highway No 1. At this point a Soviet communication detail of six men equipped with climbers was working on the line. Tappings were not observed. A beaten track was noticed under the line. ome soldiers were quartered at a farm at Vogelsdorf (N 53/V 05).  25X1X In late earth the route of the same civican minutable line was traced by second
2.	Tasdorf the line again crosses National Highway No 1. At this point a Soviet communication detail of six men equipped with climbers was working on the line. Tappings were not observed. A beaten track was noticed under the line. Tappings were quartered at a farm at Vogelsdorf (N 53/V 05).  25X1X  In late largh the route of the same circles with a line was traced by second The line ran east that the route of the same circles with of intional Highway No 1. Two masts on Chemnitzer Strasse(connecting line L-C to line C-D by underground cable) were fitted with cable hoads for distribution poles. Two houses on the west side of Chemnitzer Strasse quartered Soviet soldiers. No guards were observed along the route.
	Tasdorf the line again crosses National Nighway No 1. At this point a Soviet communication detail of six men equipped with climbors was working on the line. Tappings were not observed. A beaten track was noticed under the line. One soldiers were quartered at a farm at Vogalsdorf (N 53/V 05).  25X1X  In late with the route of the case divisor of the line of the case divisor.  In late with the route of the case divisor of the line of line line was followed from line terminal of an underground cable in the gardon plot area cast of Andernacher Strasse.  From h to 6 Pobruary the route of an open wire telephone line was followed from Berlin-Karlshorst to erneuchon. The line originated in Berlin-Karlshorst at the terminal of an underground cable in the gardon plot area cast of Andernacher Strasse.  Observations showed several Soviet control points set up close to the highway. Petween Seefold and erneuchen the line, which had been suspended from special supports and which at this point consisted of four wires only, joined an open wire telephone line running parallel to the railroad line.  On 7 April the route of an open wire telephone line running from Berlin to Perneuchen was traced between Siche (N 53/V 95) and Soefeld (N 53/V 06). Pifteen signal soldiers were observed at the line control point at the eastern edge of the Blumberg (N 53/Z 96) settlement. Four wires led from the line to the quarters of the soldiers. Near the quarters were seen four wooden masts, about 2 meters high and interconnected by telephone wires, apparently erected for training purposes. A beaten track was noticed under the trunk line, while no such track was seen under the line b
3.	Tasdorf the line again crosses lational lighway No 1. At this point a Soviet communication detail of six men equipped with climbors was working on the line. Tappings were not observed. A beaten track was noticed under the line. Tome soldiers were quartered at a farm at Vogelsdorf (N 53/V 05).  25X1X  In late largh the route of the same different formulational Highway No 1. Two masts on Chemnitzer Strasse(connecting line L-C to line C-D by underground cable) were fitted with cable loads for distribution poles. Two houses on the west side of Chemnitzer Strasse quartered Soviet soldiers. No guards were observed along the route.  From h to 6 Tebruary the route of an open wire telephone line was followed from Berlin-Karlshorst to termeuchen. The line originated in Berlin-Karlshorst at the terminal of an underground cable in the garden plot area east of Andernacher Strasse.  Conservations showed several Soviet control points set up close to the highway. Tetween Seefold and termeuchen the line, which had been suspended from special supports and which at this point consisted of four wires only, joined an open wire telephone line running parallel to the railroad line. Guards patrolled the line between Berlin and termeuchen.  On 7 April the route of an open wire telephone line running from Berlin to Termeuchen was traced between Eiche (N 53/V 95) and Soefold (N 53/V 06). Fifteen signal soldiers were observed at the line control point at the eastern edge of the Blumberg (N 53/Z 96) settlement. Four wires led from the line to the quarters of the soldiers. Near the quarters were seen four wooden masts, about 2 meters high and interconnected by telephone wires, apparently erected for training purposes. A beaten track was noticed under the trunk line, while no such track was seen under the line branching off near Abrensfelde. Only a thin trail was noticed under the line branching off between Blumberg and Seefeld. **
3.	Tasdorf the line again crosses National Nighway No 1. At this point a Soviet communication detail of six men equipped with climbors was working on the line. Tappings were not observed. A beaten track was noticed under the line. One soldiers were quartered at a farm at Vogalsdorf (N 53/V 05).  25X1X  In late with the route of the case divisor of the line of the case divisor. SECURITY INFORMATION

25X1A

\* Comment. The report refers to open wire telephone lines originating in Berlin from exchange offices in Berlin-Karlshorst, Amt 500, at the former Pionierschule in Karlshorst, and at 32 Chemnitzer Strasse.

25X1A The previous assumption that these lines continue across the Oder River toward the east has been proved erroneous with regard to the northern line. See The northern line branches out at several points, and at merneuchen consists only of four wires. The purpose of the southern line cannot be determined since its route has been traced only as far as Tasdorf. It is particularly noteworthy that the northern line was heavily guarded/three control points.
